

FortiAP™ Cloud

Manage your standalone FortiAP deployment

FortiAP Cloud is a hosted cloud-based management platform, offering zero touch deployment, configuration management, reporting and analytics for standalone FortiAP deployments¹. FortiAP Cloud offers a simple, intuitive, easy-to-use interface for managing your wireless that is available from anywhere at any time. FortiAP Cloud can scale from a small handful of APs all the way up to thousands of devices across multiple sites.

Zero Touch Deployment

Initial configuration of access points can be a difficult proposition, often requiring expert staff on site to configure each device individually. FortiAP Cloud with FortiDeploy greatly simplifies initial configuration and onboarding by providing one-touch provisioning when devices are deployed.

Highly Scalable

Cloud-based model can manage deployments from single digits up to multiple thousands of FortiAPs, and can easily grow with your deployment along the way.

Multi-Tenancy

Maintain multi-tenancy for many customers within a single license. Simple Central visibility and access across all tenants. Enable Read-Only customer accounts with unique customer logos on reports.

Highlights

- Easy Provisioning — FortiAP network settings are configured through an easy-to-understand UI
- Robust Monitoring — Topology views, Port level view, Status monitoring
- Troubleshoot — Event Logs, Alarms, and Alerts
- Free Option — Basic configuration and 7-days of logs at no charge
- Two-factor Authentication — Supports FortiToken for two-factor authentication of user login
- Smart APs — FortiGuard-backed UTM services when using the FortiAP-S Smart line of Access Points
- Privacy Compliance — Isolated instances for Europe, Americas, and Asia to meet local privacy laws.

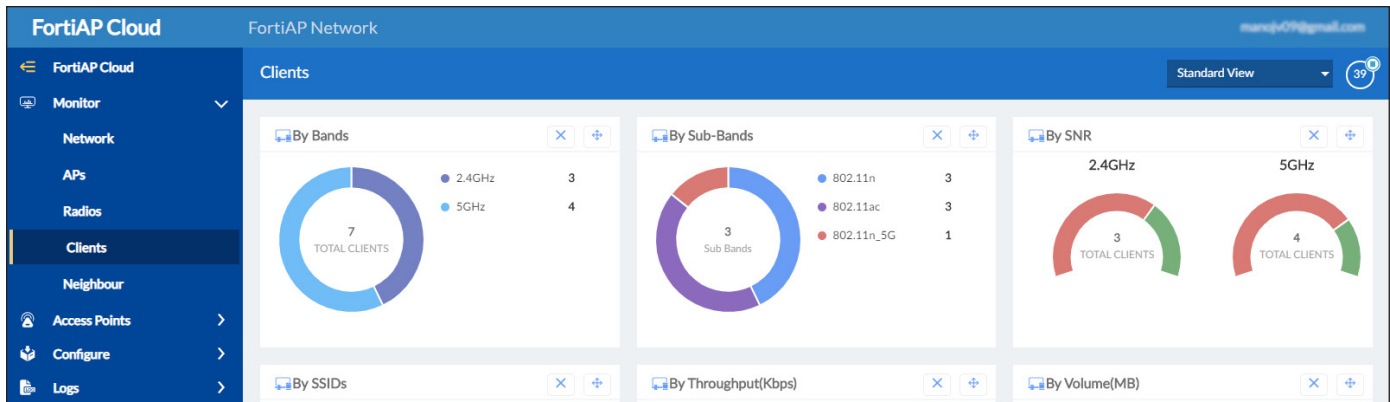

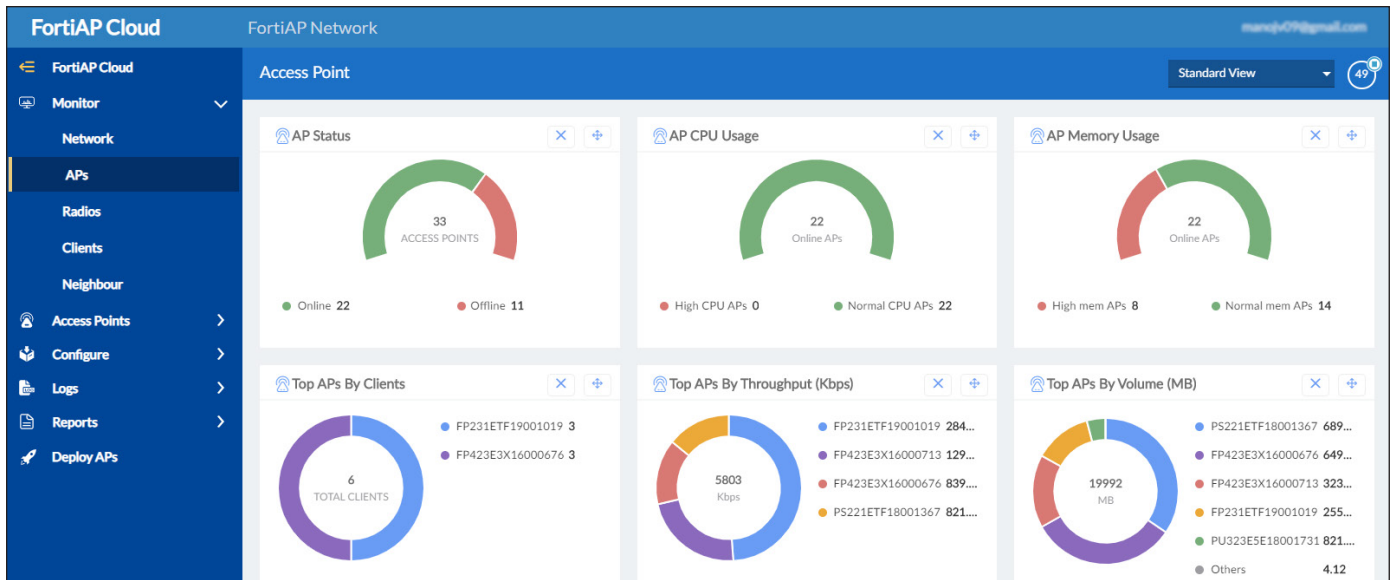

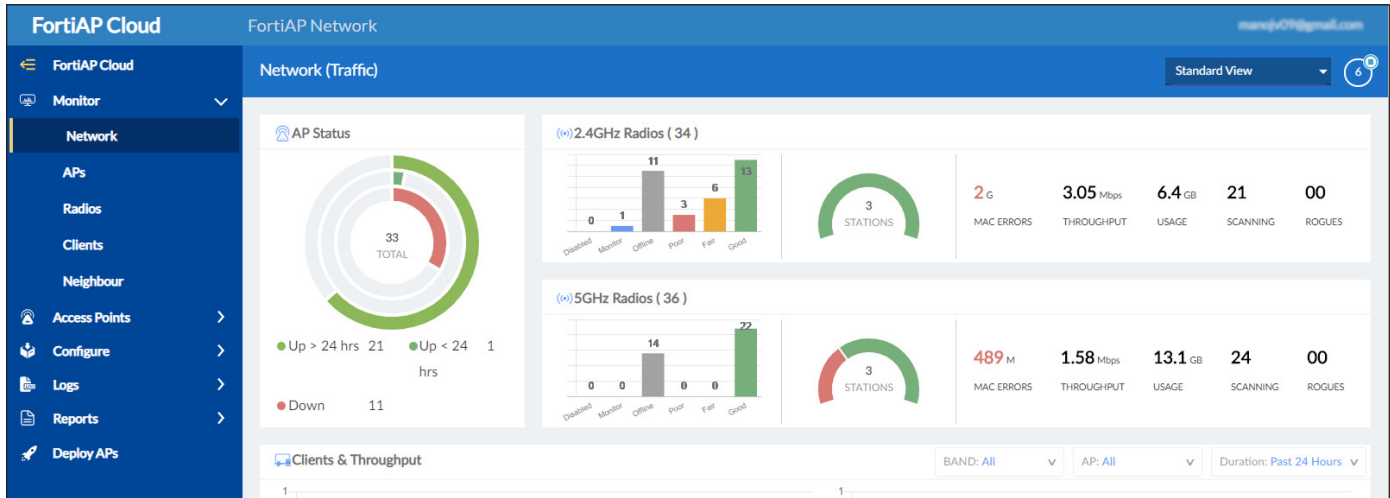

¹ For cloud management of FortiGate-based FortiAP environments, the FortiGate Cloud-hosted system should be used.

Highlights

Dashboards for Ease of Management

Multiple monitor dashboards offer a view of key statistics for all managed APs, radios, clients, and neighboring networks in your environment.

Click to drill down on a particular item to see details on specific devices in a category. There is no need to change screens or hunt through the UI to find information.

Highlights

Simple Configuration

FortiAP Cloud features a simple and intuitive UI workflow that helps you set up your network quickly and easily. Set your SSID, security settings, etc., and let FortiAP Cloud take care of the rest. Need a

Captive Portal for your guests? It can be set up in a few clicks of the mouse.

The screenshot shows the FortiAP Cloud configuration page for a new SSID. The interface is divided into a left sidebar and a main configuration area. The sidebar includes options like Monitor, Access Points, Configure, SSIDs, Platform Profile, AP Tags, MAC Access Control, QoS Profile, FortiAPCloud User/Group, My RADIUS Server, Tunnel Profile, Network, Bonjour Relay, and FortiPresence. The main area is titled 'FortiAP Network' and shows a progress bar with steps: 1 Access Control, 2 Security, 3 Availability, and 4 Preview. The configuration fields include: SSID (input field), Enabled (checked), Broadcast SSID (checked), MAC Access Control (unchecked), Mesh Link (unchecked), Authentication (Open), OWE Transition (unchecked), Captive Portal (No Captive Portal), IP Assignment (NAT selected), QoS Profile (<Disable>), VLAN ID (0), LDPC (RXTX), High Efficiency (checked), and Target Wake Time (checked). There is a 'Cancel' button in the top right and an 'Advanced Settings' link at the bottom.

Zero Touch Deployment

Large Network deployments, especially those involving distributed locations, can create challenges including the potential need for skilled workers to stage and set up complex designs. FortiAP Cloud leverages Fortinet's FortiDeploy logic to simplify the deployment aspect. All that is required onsite is a person to physically connect the AP to its power source and ensure internet access is available. Each FortiAP ships with an individualized key

allowing it to be managed by FortiAP Cloud. The administrator need only add that key to their dashboard and the FortiAP can pick up its configuration from FortiAP Cloud directly. With the FortiDeploy service, multiple FortiAPs can be combined into a single key for rapid enablement of large numbers of devices. For more information on FortiDeploy, please see our website at www.fortinet.com.

The screenshot shows the FortiAP Cloud interface during the 'Set AP Admin' step of the deployment workflow. The progress bar indicates steps: 1 Select APs from Inventory, 2 Set Platform Profiles, 3 Set AP Tags, 4 Set AP Folder, 5 Set Admin, and 6 Preview. The main area shows a search bar for SN (Serial Number) and an 'Add AP' button. Below is a table listing APs:

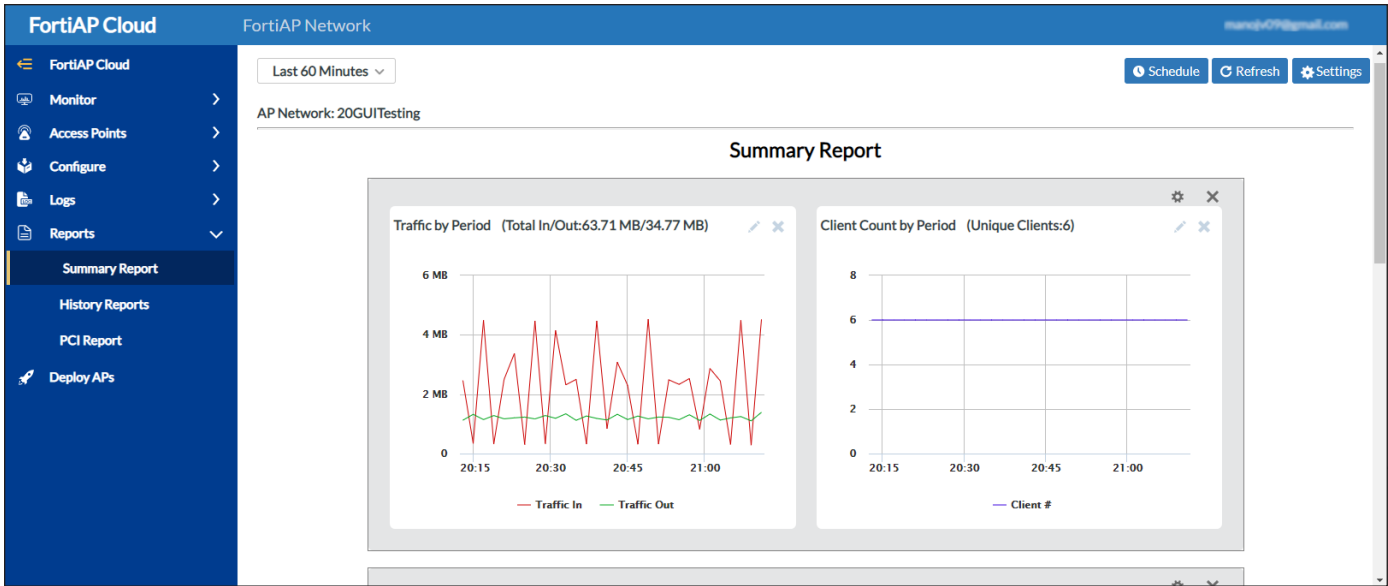

#	<input type="checkbox"/> ALL (0)	Device	Claimed On
1	<input type="checkbox"/>	PU221ETF18017327	2020-01-23 10:21
2	<input type="checkbox"/>	FP321CTF18009870	2020-01-23 10:20

Navigation buttons for '<< Prev' and 'Next >>' are located at the bottom right.

Highlights

Reporting

Run reports on current status and past information or run a PCI Compliance report.

Order Information

Existing FortiGate customers that are interested in cloud management of FortiAPs that are connected to their FortiGates should leverage FortiGate Cloud, not FortiAP Cloud.

FortiAP Cloud offers a tiered pricing model, with basic configuration and control of your Access Points and 7 days' worth of logging at no charge. To enable advanced wireless configuration options², 1 year of logging, and 24x7 FortiCare customer service, a per AP license is necessary.

Note that for FortiAP-S, a different license is required which also enables FortiGuard services on the AP.

Product	SKU	Description
FortiAP Advanced Management License for FAP-S Series	FC-10-90APS-639-02-DD	1 Year FortiAP Cloud FAP-S Advanced Management License includes: FortiGuard Subscription Services, Premium AP Management Features, 1 year Log Retention, 24x7 FortiCare.
FortiAP Advanced Management License for FortiAP Series	FC-10-90AP1-639-02-DD	1 Year FortiAP Cloud FAP (FAP/FAP-U/FAP-C) Advanced Management License includes: Premium FAP Management Features (where applicable for model), 1 year Log Retention, 24x7 FortiCare.

² Advanced configuration features include the ability to customize basic rates, the ability to disable data rates, the ability to block intra-SSID traffic, and the ability to configure a Bonjour relay.
